

FOLIO INTERACTIVE

Visual Identity System

Version 2.0 — April 2026
Confidential — Internal Use Only

1. Color System

Primary — Trust & Authority

Swatch	Name	Role	WCAG
1A5C9E	Atlas Blue	Primary actions, navigation, headings	AA
0F3F72	Deep Atlas	Hover states, emphasis	AAA
EAF4FC	Sky Tint	Backgrounds, highlights	AAA

Secondary — Mastery & Growth

Swatch	Name	Role	WCAG
1A9068	Sage Teal	Success, mastery, progress	AA
0A4A35	Deep Sage	Confirmed mastery, completion	AAA
E6F8F2	Mint Tint	Correct answers, encouragement	AAA

Accent — Attention & Warmth

Swatch	Name	Role	WCAG
B56A10	Warm Amber	Alerts, nudges, in-progress	AA
FDF3E0	Honey Tint	Hint areas, soft warnings	AAA

Neutrals — Structure & Space

Swatch	Name	Role	WCAG
28281F	Ink	Body text, primary content	AAA
5A5950	Slate	Secondary text, captions	AAA
D1CFC4	Warm Gray	Borders, dividers	AA
F3F1E9	Parchment	Page backgrounds, card fills	AAA

Extended States

Swatch	Name	Role	WCAG
C0392B	Error	Wrong answer state	AA
FCECEA	Error Tint	Wrong answer background	AAA
C9A800	Yellow	Near-miss, partial credit	AA
FFF9D6	Yellow Tint	Partial credit background	AAA
6B4EAA	Depth	Advanced concepts	AA
F0ECFA	Depth Tint	Deep concept background	AAA
B5477A	Inference	Learner VARK data layer	AA
FCEEF5	Inference Tint	Learner profile background	AAA

Semantic Mapping

Color	Semantic Role
Blue	Authority / Navigation
Teal	Progress / Mastery
Amber	Attention / Encouragement
Red	Error / Wrong Answer
Yellow	Partial Credit / Near-Miss
Purple	Advanced Concept Depth
Pink	Learner Inference / VARK Data
Neutrals	Structure / Space

All text/background combinations meet WCAG AA contrast minimum. AAA achieved on all tint combinations.

2. Typography

Type Pairing

Source Serif 4 (serif) carries editorial authority at heading scale. Barlow (sans-serif) delivers legibility and warmth at UI and body scale. Both are available via Google Fonts at no cost.

Source Serif 4 replaces Lora from v1. Lora carried literary-novel associations. Source Serif 4 is screen-optimized, reference-work in character — closer to an atlas than a bookshelf.

Type Scale

Role	Font	Size / Weight	Usage
Display / H1	Source Serif 4	32px / 600	Hero text, module titles, major headings
H2	Source Serif 4	20px / 500	Section headers, lesson titles, card headings
Body / Subheading	Barlow	16px / 400, 1.7 lh	Lesson content, instructions, explanations
UI Labels / Nav	Barlow	14px / 500-600	Navigation, buttons, labels, form fields
Captions / Meta	Barlow	12px / 400	Timestamps, module metadata, footnotes

Usage Rules

- Source Serif 4 is used for headings only — never for body copy or UI labels.
- Barlow replaces Helvetica Neue or Arial in all digital contexts.
- Minimum body size: 16px. Minimum caption size: 12px. Never go below 12px in any UI context.
- Two weights only in Barlow: 400 (regular) and 500-600 (medium/semibold). Avoid 700+.
- Line height for body copy: 1.7. Headings: 1.2-1.35.

Stubbed — Grade-Responsive Type Scale

A grade-responsive type scale — adjusting size, weight, and line height by grade band (K-5, 6-8, 9-12) — is deferred to Phase 2. The current scale is calibrated for 9th grade (pilot). DM Serif Display is stubbed as a future display-only option for hero contexts.

3. Tone Spectrum

Six-Axis System

Folio’s tone is defined across six axes. Each axis has a left pole (value 0) and a right pole (value 100). Folio’s default position is defined for the brand overall and overridden per context.

Axis Definitions & Default Positions

Axis	Left Pole (0)	Right Pole (100)	Folio Default
Formal — Casual	Formal	Casual	30 — leans formal, structured not stiff
Serious — Playful	Serious	Playful	25 — leans serious, levity earns its place
Authoritative — Humble	Authoritative	Humble	40 — balanced, earns authority, admits limits
Warm — Reserved	Warm	Reserved	35 — leans warm, present not effusive
Precise — Expansive	Precise	Expansive	25 — leans precise, specificity over elaboration
Direct — Exploratory	Direct	Exploratory	45 — near center, answers clearly, invites further

Context-Specific Overrides

Axis	Wrong Answer	Mastery	Onboarding	Instructor UI	Hint
Formal — Casual	35	40	45	20	42
Serious — Playful	20	35	40	15	28
Authoritative — Humble	35	45	50	75	52
Warm — Reserved	35	30	40	75	25
Precise — Expansive	20	30	35	15	38
Direct — Exploratory	35	50	55	20	62

Convention: 0 = fully left pole, 100 = fully right pole. Hint is the warmest and most exploratory context. Instructor UI is the most formal and precise. Wrong answer prioritizes diagnostic precision with Caregiver warmth retained.

4. Artifact Framework

Two-Track Builder Specification

All interactive artifacts belong to one of two tracks. Builders must identify the track before designing any artifact.

Track	Concept-Serving (Priority)	Engagement (Stub)
Definition	Interaction exists to deepen understanding of the concept. The artifact is the learning.	Basic engagement layer. Not concept-essential.
Example	Placing legend elements on a map. Tracing a route using scale. Matching coordinates to a location.	Visual reward on completion. Progress animation. Sound design.
Build status	Build now. Required for pilot.	Stub until suitable phase. Not required for pilot.
Design test	Does the interaction serve the concept, or does it serve engagement?	If engagement is the primary driver, it belongs in this track.

No gamification. Interaction is always in service of the concept, not the reward. Kinetic artifacts include: React map-reading and display components, coordinate placement, legend matching, scale calculation tools.
